CHONG CHYE NEO
Independent Non Executive Director

BURSA MALAYSIA

Chong Chye Neo retired as MD/CEO of IBM Malaysia in Dec 2018. She holds the distinction of being the first woman to helm the company in its then 55-year history in Malaysia. She currently serves as an Independent Director of multiple Public Listed Companies.

She was part of the Information Technology (IT) industry for more than three decades, starting her career as a software engineer on the plant floor. In her 30 years at IBM, she held leadership roles that spanned across multiple disciplines of technical, sales, Intellectual Property, business and strategy development. She led diverse teams to successfully drive businesses in markets across 15 countries in Asia Pacific.

In 2016, Ms. Chong was recognized with the "CEO Champion Award" by Talentcorp. In Nov 2017, she was appointed to Talent Compact 4.0, an advisory panel in response to the impact of Industry Revolution 4.0 and the implication to the future of work. In April 2018, she was recognized by the Malaysian Business publication as one of Malaysia's 25 Women of Influence. She was also appointed to the Board of Governors of American Malaysian Chamber of Commerce in 2018 and was conferred an Honorary membership upon her retirement.

As part of her contribution back to the community and continuous peer learning, she regularly participated on panels, speaking on topics ranging from leadership development, digital innovation and more recently, the role of digital technologies in supporting sustainability practices.

In 2021, she mentored 3 cohorts of women leaders organized by LeadWomen, ICDM and 30% Club Malaysia and was a judge for the national level UN Women Empowerment Principles Awards and Kincentric Best Employer Awards programs.

Chye Neo graduated from Universiti Sains Malaysia where she majored in computer science and attended executive programs at Harvard Business School, Boston.

ZAKARIYA OTHMAN

General Manager
Head of Big Data Management

TFX
ISLAMIC

Having had more than 35 years in accounting. auditing, risk and credit, Zakariya Othman is now into financial technology (fintech) and big data analytics. He started to embark into fintech and big data analytics when he was involved in Fintech Booster program by the Malaysian Digital Economy Corporation (MDEC) in collaboration with Bank Negara Malaysia. The capacity building program is to assist fintech companies, both local and foreign, in developing their products and services via three strategically crafted modules: legal & compliance, business model and technology. He was also involved with the London-based Alqami.com, a Big Data company that helps businesses realising the commercial returns from their data and at the same time, facilitates companies to find the right data to deliver the best results in their business decisions and investment or risk models.

He is currently the General Manager and Head of Big Data Management at TFX Islamic, a fintech company that focusses on Big Data Analytics. He leads the data analytics team to conduct the full range of data analyses to provide clients with comprehensive and analytical insights from the huge database. As an experienced credit and risk assessor, Zakariya provides credit assessments on companies seeking funding on the digital supply chain financing platform provided by TFX Islamic to help close the financing gap for the Small- and Medium- Enteprises (SMEs)

Prior to joining TFX Islamic, he was headhunted by the Saudi Government to lead the setting up of the first domestic rating agency in Saudi Arabia. In fact, the rating agency is considered as the first in the Gulf Cooperation Council (GCC) region, having considered the Bahrain-based International Islamic Rating Agency (IIRA) as an international rating agency. As a licensee of the Saudi's Capital Market Authority, he was also appointed to be on several committees under the Ministry of Finance as well as Ministry of Economic and Planning including for projects under the Saudi Vision 2030. He has held senior positions with RAM Rating Services, International Centre for Education in Islamic Finance (INCEIF), Permodalan Nasional Berhad and Ernst & Young.An ACCA-qualified with a Masters in Communication (Financial), Zakariya was amongst the earlier batches of Post Graduate Diploma in Islamic Banking and Finance, offered by the then Management Centre of International Islamic University Malaysia.

IVAN WOO

Since April 2021 until now, she is the Leader of Siber Sejahtera Flagship 2.0, a flagship aimed at providing Cybersafety and Cybersecurity advocacy campaigns to the IIUM community, and other communities (children, students, parents, teachers, employees and senior citizens). To date, 10 Siber Sejahtera events have been conducted for IIUM staff & students, schools in Selangor and Melaka, and government agencies such as INTAN and PUSPANITA.

DAVID VOO
Designation Founder / CEO

ALPHA DIGITAL
Consultancy Services

With 20 years of experience in IT, 9 years of CTO experiences, he is an early advocate of cloud technology since 2010.Trained as an application software architect, he served most of his working years in media communications, real estate advertising and financial services. On his early days of cloud service exposure when he was serving as Group Chief Architect for iProperty Group.

Adopting cloud services strategies and implementation into multiple entities from international MNC like Mediabrands to local MNC like Star Publications, besides MNC he also introduced cloud services to many SME companies and start-ups as well. Startup companies like MyTukar.com and Hoppler.com.ph are some of his successful clients whom leverage their business in the early days where these companies has successfully obtained funding from VC today.

Some of his introduction of cloud services including Amazon Web Services, Huawei Cloud and Alibaba Cloud. From infrastructure cloud to full cloud end-to-end development cycles, from media processing storage to Artificial Intelligence solutions, many of his clients are able to leverage on cloud technology right from day 1 or done a full transformation from on-premise to cloud. His clients are able to enjoy the scalability and cost effectiveness of using cloud services while able to provide hosting, storage and many services without a single investment on-premise.

He was also guest speaker of Amazon Web Services and Asia AI forum where he demonstrated some of the use cases running AI solutions over the cloud and zero on-premises investment. In the event of regulations compliancy, he also recommended clients to design a Hybrid cloud-to-premise setup with state-of-the-art security framework, ensuring highest possible access security balance with acceptable speed.

Over the years, he has witnessed many transformation in the industry both cloud providers and adopters where cloud has emerged from being a trial technology till today as many companies regardless big or small, including government agencies has accepted the technology.
